The tab, as an icon.

A graphite tile with the chrome ring and a coral arc from 12 o'clock. It is the app icon, the favicon and the nav mark. Use the supplied file, never a redraw.

96 · 48 · 32 · 16 px. Smallest use: 16 px favicon.

Nav lockup: 30px icon beside a 22px wordmark, 10px gap, Funnel Display 600.

Clear space

a quarter of the icon's width on every side.

Keep the arc

coral, starting at 12 o'clock. It means "spent", so it never fills the ring.

Don't

recolour, outline, rotate, flatten the chrome or add effects.

Files

favicon.ico, favicon-32, apple-touch-icon (180), icon-192, icon-512, logo-mark.

The ring is the tab.

TAB has one signature object. A chrome ring stands for a tab's limit, and everything it shows is real data. It appears in the hero, on the dashboard dial, on every tab in the list and on the tab page.

A	Chrome band	The whole limit. Always the full circle. Drawn as a metallic conic gradient, never flat.
B	Coral arc	What has been spent, clockwise from 12 o'clock. Coral appears here because spending against a limit is what coral means.
C	Held arc	Payments signed but not yet confirmed on chain, in translucent coral right after the spent arc.
D	The number	What is left, in Geist Mono with tabular figures. The line under it reads "USDC left of 5.00", with the limit in coral.
E	States	Limit reached: the arc fills the ring and the copy says so. Revoked or closed: the arc turns grey and the band dims.

Near-monochrome. One accent.

Two grounds, stone and graphite, carry the whole site. The hero is stone; everything after it is graphite. Text colours are paired to their ground.

GROUNDS

Stone
#E8E6E0 · 232 230 224
Hero, light panels

Stone 2
#D6D4CD · 214 212 205
Cards on stone, hero edge

Graphite
#1B1B1A · 27 27 26
Page background

Graphite 2
#252523 · 37 37 35
Panels, chips, inputs

Graphite 3
#2F2F2C · 47 47 44
Raised elements, switch track

TEXT AND ACCENT

Paper
#F3F2EE · 243 242 238
Text on graphite, light pills

Paper 2 / 3
#A9A8A2 · #75746E
Muted text, then hints and numerals

Ink / Ink 2
#0A0A09 · #5B5A55
Text on stone and on paper

accent

Coral
#FF4D2E · 255 77 46
Limit, refusal, destructive. Only.

accent-deep

Deep coral
#B8321A · 184 50 26
Coral on stone and paper

Every pair is checked.

Receipt paper is used for anything printed by the product: the agent receipt, the terms you sign, the ledger and the agent key ticket. Green only ever means "settled".

Receipt paper
#F1EFE9

Settled
#9FD8AD on dark

Settled on paper

#4A4945 + paper

Lines
paper @ 12% · 20%

PAIR	RATIO	USE	WCAG
Paper on graphite	15.4 : 1	All body and display text on dark	AAA
Paper 2 on graphite	7.2 : 1	Muted text, second beat of headlines	AAA
Coral on graphite	5.2 : 1	Refusals, revoke, limits on dark	AA
Ink 2 on stone	5.5 : 1	Muted text on light	AA
Deep coral on stone	4.8 : 1	Coral meaning on light panels	AA
Coral on stone	2.6 : 1	Graphics only (the arc), never text	Text: no
Paper 3 on graphite	3.7 : 1	Hints, numerals, large text only	Large only

Coral means stop.

The single accent carries meaning, so it stays rare. If something is coral, the reader should expect a limit, a refusal or an action that can't be undone.

✓ USE FOR

Limits

The spent arc on the ring, the limit figure after "of", the dial's fill and knob ring, a tab that has reached its limit.

✓ USE FOR

Refusals

Refused payments and their reasons, failed checks with their error code, form errors, the "TAB can't" heading.

✓ USE FOR

Destructive actions

"Revoke tab", the revoked status, the "pull the plug" path. Plus the toggle when it is switched on, as the single interactive exception.

✕ NEVER FOR

Decoration

No coral headlines, backgrounds, gradients, glows or highlights for emphasis. Emphasis comes from size and the muted second beat.

✕ NEVER FOR

Success

A paid payment is paper or soft green, never coral. Coral on a success state would read as an error.

✕ NEVER WITH

A second accent

No blue links, no purple, no brand colours from partners. Wallet logos keep their own colours because they are other people's marks.

Three faces, three jobs.

All three are free on Google Fonts. Display sets the voice, Sans carries reading, Mono carries every number the product owes you.

DISPLAY · HEADLINES

Aa

Give your agent a tab. Not your wallet.

STATEMENT	Hand it a tab and it spends what you said, then s…	Display 400 · 2–4.5rem
H3	Give the agent a key	Display 500 · 1.3–1.6rem · −0.025em
LEDE	The funds sit in a token account your wallet owns.	Sans 400 · 1–1.18rem · 34ch wide
BODY	Every x402 bill is checked against your rules, then signed.	Sans 400 · 15–16px · 1.5
BALANCE	3.10	Mono 500 · tabular · −0.04em
EYEBROW / LABEL	HOW IT WORKS · 02 · MAX PER PAYMENT	Mono 500 · 11–12px · +0.12em · caps

Say what happens. Nothing more.

Give your agent a tab. Not your wallet.

Four steps. One signature.

Your money never leaves you.

Short, declarative, specific. A headline is a plain statement followed by a muted second beat.

Plain words first. Tab, limit, key, close it out. Save delegate, allowance and token account for the docs.

Name the cause and the fix. "Not enough left on this tab for this payment." No apologies.

True twice over. "It can't spend past the limit" is enforced by TAB's ledger and by the token program. Claims like that, or none.

Numbers are exact. 0.20 USDC, 1,000 USDC beta cap, about 0.002 SOL rent. Never "low fees" or "lightning fast".

No em dashes, no exclamation marks, no emoji. Commas and full stops do the work.

Pills, chips, paper.

Buttons are pills. The primary pill carries a chevron disc that nudges right on hover. Anything the product "prints" sits on receipt paper.

BUTTONS

STAMP

NEVER PAST YOUR RULES

Lands with a spring when a run finishes. Ink on paper, rotated −8°.

Calm, then exact.

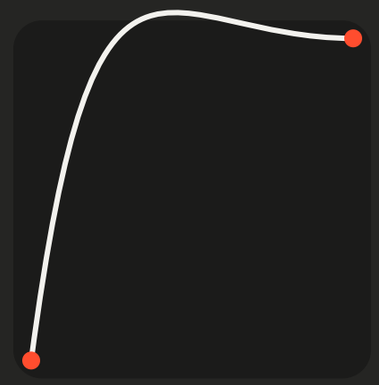

Scroll drives the story and always rewinds. Motion uses transform and opacity only, so it stays smooth on a weak laptop, and parks when it's off screen.

Ease

`cubic-bezier(.22, 1, .36, 1)`

Everything: entrances, the ring, panels, receipts printing. Fast start, long soft landing.

Spring

`cubic-bezier(.2, 1.35, .4, 1)`

Only for things you touch: pill chevrons, switches, the FAQ chevron, the stamp and the key ticket.

SIDE GUTTER

16–56px

clamp(16px, 4vw, 56px). 16px on phones.

PANEL RADIUS

20–28px

clamp(1.25rem, 2vw, 1.75rem). Pills fully round. Receipts 6px with a torn edge.

LISTS

Ruled

Hairline rules, numbered only when order is real. No uniform card grids.

REDUCED MOTION

Still

All transitions off; the hero shows a still frame with real numbers.

09 · NEVER

What TAB doesn't do.

These are the common tells of generated, generic product pages. Each one dilutes the single idea the brand rests on.

- × Gradient or rainbow text
- × Pulsing "live" dots and green status pills
- × Uniform grids of identical cards
- × Typing effects and fake terminals that loop forever
- × Coral used for decoration or for success
- × Glows, neon edges, floating orbs
- × Emoji as icons or section markers
- × A second accent colour, or purple
- × Buzzwords: "revolutionary", "seamless", "lightning fast"
- × Stats, logos or testimonials that aren't real

Copy these exactly.
